

CITRIC ACID 50%

Citric Acid 50 % is a liquid concentrate for the highly efficient citro-thermal disinfection, cleaning and decalcification of haemo-dialysis machines. The concentrate is used at 83°C in accordance with the machine manufacturer's instructions.

Unlike disinfecting agents that have strongly oxidising or aggressive acidic properties, Citric Acid 50 % with its highpowered disinfectant properties is very material compatible, user friendly and environmentally neutral.

Benefits of Citric Acid 50%:

- outstanding disinfectant and virucidal properties; bactericidal, fungicidal, tuberculocidal, and virus-inactivating (incl. Parvovirus, HBV, HCV, HIV)
- Economical, since only low concentration and quantities are needed
- Gentle on materials and highly effective at the same time
- Each application takes very little time
- No hazardous materials
- Safe to use and environmentally neutral

Packaging: PE-canister
REF per canister: 899 (6-litre), 307 (10-litre)
Qty. per pallet: 90 (6-litre), 60 (10-litre)
Shelf life: 36 months
