

BICARBONATE CONCENTRATE

For manufacturing alkaline bicarbonate haemodialysis concentrates for extracorporeal bicarbonate haemodialysis or bicarbonate haemodiafiltration.

Alkaline bicarbonate haemodialysis concentrate may only be used in combination with an acidic bicarbonate haemodialysis concentrate diluted as prescribed.

Type:	Bicarbonate powder for hemodialysis
Composition:	NaHCO ₃ Sodium bicarbonate [g/L] 84.0 Na ⁺ [mmol/L] 1.000 HCO ₃ [mmol/L] 1.000
Packaging:	8.4 kg bag
Litres of concentrates:	100 L
Presentation:	3 bags per carton 90 bags/pallet
REF per carton:	470

Product benefits of Sodium hydrogen carbonate:

- Easy-to-use logistics and concentrate manufacturing
- Less storage volume
- High product quality
- Sodium hydrogen carbonate powder complies with the European Pharmacopoeia monograph
- Shel life: 36 months
